THIS BAG IS MADE FROM 100% RECYCLED PAPER AND IS 100% BIODEGRADABLE. PLEASE RECYCLE AND REUSE.

IN THE BOX PACKAGING™

Working directly with the people who understand your needs

Easypack – Passionate about quality and service

Easypack, the provider of high performance void-fill cushion packaging products, prides itself on its deep understanding of customers' needs and first class customer service. Its specialist cushion packaging systems are purpose-built to suit a wide range of applications, providing protection and void fill for goods in transit.

Anytime, anywhere – packaging on demand

Easypack's systems convert 100% recycled paper, biodegradable film or surplus cardboard boxes into easy-to-use packing materials, on demand, exactly where needed. The user-friendly and cost-effective paper and air pillow based systems can dramatically improve packing productivity while meeting the growing demand for environmentally safe, biodegradable packaging.

Success built on delivery

Since the company was founded in 1994, Easypack has built on its reputation as the high quality manufacturer and supplier of bespoke void fill packaging solutions, suitable for all industries. Companies as diverse as Aston Martin and GlaxoSmithKline have turned to Easypack for high performance packaging solutions – backed up with first class customer care and after sales service.

Sustainably cost effective

In today's ecologically aware society, many customers prefer Easypack's environmentally friendly packaging solutions. From the 100% recycled paper which is both recyclable and biodegradable, to the shredder that converts waste corrugated boxes into packaging material to the 100% biodegradable air bags, Easypack products add to your organisations' green credentials. Easypack have also designed their solutions to enable customers to use less packaging material. For example, adopting Easypack's packing techniques often means that it is not necessary to fill the whole space inside the box as better protection can be achieved using minimal material.

Expertise and experience

Easypack's in-house designers and engineers have the knowledge and experience to provide solutions for the most complex warehouse projects. They pride themselves on understanding our customers' needs to ensure that each solution can be tailor-made to the customer's requirements – including multi-line conveyors, even where space is limited.

Easypack®

Service that's second-to-none

Easypack knows that a high quality of service, combined with exceptional customer care and an up-to-date technical infrastructure, is what you expect. Easypack's personal approach is both friendly and expert, but also highly efficient and responsive to customer needs. Our engineers and design team deal directly with the end users, delivering quick responses and ensuring they develop continually improved solutions.

Easypack's after sales service is second to none – the customer care program and preventative maintenance schedule ensures that Easypack continually maintain a positive relationship directly with it's customers.

The Easypack systems are built to the highest standard but should the unexpected happen dedicated engineers are on call to quickly and efficiently resolve any issue. Easypack maintains stock of all consumable products ready for dispatch direct to your facility.

Award winning European coverage

The company's success in the UK has spread into Europe, so that today there are Easypack companies in France, Germany, Denmark and the Benelux, as well as a distributor network covering many other European countries. So successful has this overseas expansion been that the company won the prestigious Queens Award for International Trade.
